Dear Potential Sponsor,

We are BoilerMake, a team dedicated to providing hackers with an unforgettable experience, to designing a creativity-inducing environment, and to cultivating innovation and collaboration across schools and fields of study. BoilerMake is Purdue University's 36-hour hackathon where students utilize a variety of software and hardware tools to solve real-world problems.

We would like to extend the opportunity for your company to be a part of our event. BoilerMake sponsors get access to a community of 500 highly motivated university students who have a passion for developing technologies. This pool of talent is a place to find qualified job and internship candidates, assess their work, and evaluate their ability to function in a team. Additionally, you have direct access to the next generation of leaders and innovators, being able to promote your company's goals and introduce them to your new technologies.

Other sponsor benefits include:

- ✦ Gaining access to hackers' resumes, emails, GitHubs, and LinkedIns profiles

- ✦ Awarding prizes based on your company's criteria

- ✦ Promoting your company through giveaways and advertising

- ✦ Demonstrating your company's new APIs and other technologies

- ✦ Reserving rooms for private events (tech talks, mentorship sessions, etc.)

We can't wait for you to be a part of BoilerMake IV.

Thank you,
BoilerMake
